

# TMS<sup>®</sup> Tyre Monitor System

## Wireless Tyre Pressure Monitoring System

## Evaluation Kit

All the system components supplied in one kit to enable you to evaluate your tyre pressures

Everything you need in one kit to get testing and see the tyre air pressure in real time.

High accuracy sensors mean that this system can be used as a wireless pressure gauge.

The display and audible alarms on the Operator Interface allows the driver to know exactly what is happening regarding the air pressure inside the tyres, and take action to ensure the tyres are kept at optimum pressure.

Alarms can be enabled and disabled via TMS Manager.

### GBP 1600.00

All prices quoted are stated in GB pound sterling. Duty, if applicable, is unpaid. Price excludes shipping which is charged at cost.

#### Sensors

Six sensors  
433.92MHz  
Bands and patches for mounting options

#### Receiver

433.92MHz  
Powered from vehicle supply

#### Operator Interface

Displays PSI for each wheel  
Alarms visual & audible

#### Cabling

4 x 2m BNC antenna  
Serial/USB cable  
Receiver to operator Interface connection

#### TMS Manager

PC Windows application for system configuration and downloading logged data

Monitor and display tyre pressures for up to 6 wheels.

Log data

Low and high pressure alarm

High temperature alarm

**Tyre Monitor System could help lower vehicle maintenance costs by alerting drivers and site managers to improper air pressure in tyres. Improper air pressure accelerates tyre wear, reduces fuel efficiency and can cause tyres to fail.**
